OCTOBER UPDATE

In our October newsletter, we are pleased to showcase our Locks4Vans rebrand. We have used Yootheme Pro 2 to build a whole new look.

We also look back on Joomla's Pizza Bugs and Fun 2020 which took place on October 17th.

Locks4Vans Website Rebrand/Relaunch

In the images above you can see the changes, we have made from the previous site to the current site. The template is now Yootheme Pro throughout, and this particular section shows the slider.

The new layout has a complex relationship between the different van types and the products that each van type can use. This is made possible by the use of Yootheme Pros' dynamic content allowing templates to be built that can pull in articles, custom fields and even run conditionals to make very specific content selections.

Pizza, Bugs & Fun - Worldwide Road to Joomla!™ 4.0

It's crunch time! Joomla 4.0 is now in beta (and hopefully release candidate on the day of the PBF event), but numerous improvements & fixes are still untested and cannot be merged into the Joomla! core. New features that have been implemented into Joomla still need to be extensively tested to get a stable release. Most of the time it only takes a few minutes of your time and Joomla! has become a bit better.

For several years now, there have been so-called "Pizza, Bugs & Fun" (PBF) events around the world, where everyone can learn how to perform such tests. Together, all open issues are addressed, tested and documents made available for publication. At the same time sponsors make sure that you don't starve to death at work.

This year everything is a bit different: Unfortunately, the COVID 19 pandemic is still raging worldwide and a cure is not in sight. That's why the PBF team has decided to organize a virtual PBF event.

Main meeting point will be GLIP as every year and we will provide several video conferencing instances. There will still be Pizza of course, but this time with a little twist.

You want to join the PBF? Good to hear, we have come up with something special this year: the first 100 participants will receive a PBF survival package from us. How does that work? Just click on the following link, fulfil the conditions and participate:

the testing of pull requests.

The success of Pizza, Bugs and Fun brings the release of Joomla 4 that little bit closer.
